STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Let motorcycle cool.

WARNING YOU WILL BE WORKING AROUND THE ENGINE AND EXHAUST SYSTEM DURING INSTALLATION. ENSURE THAT THE ENGINE AND EXHAUST SYSTEM HAVE FULLY COOLED TO PREVENT INJURY.

NOTE: Sizes listed for Kool Kaps are the wrench size used on the fastener, not the fastener shaft size.

NOTE: Not all Kool Kaps will be used for every application. If do not use all the Kool Kaps in the suggested areas, you may use them on any appropriate sized fastener on the bike. The following are suggested locations.

NOTE: Kool Kaps are designed to friction fit over SAE fasteners. In case the fit is not tight enough for your satisfaction, we recommend using a silicone adhesive to ensure the Kool Kaps stay in place. Apply a small amount of the silicone to the Kool Kap and press it in place. Remember, silicone expands as it dries, so using a little less will help keep the Kool Kap tight to the fastener head when the silicone dries. The silicone will fully cure in 24 hours.

NOTICE DO NOT USE ANY OTHER TYPE OF GLUE TO ADHERE THE KOOL KAPS TO ANY FASTENER, EXCEPT FOR SILICONE ADHESIVE.
